New Process Greatly Reducing Time and Cost Discovered by Cincinnati Inventor.

TWENTY MINUTES REQUIRED.

Finished Leather Has Been Tested and Plants Will Be Established Throughout the Country.

REPUBLIC SPECIAL. Cincinnati, O., June 6.-The discovery of a process of tanning by means of which hides can be transformed into leather in a short time by the use of the X-rays is the result of four months of experimenting, and will be the first application of the X-ray to

Heretofore the ray has been valuable only to the medical fraternity, but the invention of Cincinnati men opens the way for it to become an important factor in the com-

mercial worlds. The hides will be soaked in lime for the separation of the fibers and removal of the hair as is done now. When this has been completed, which usually requires about four days, the hides will be soaked in a solution of chemicals, a part of the invention, for about two hours, and will then be exposed to the X-rays for about fifteen or twenty minutes, after which they will then proceed in the way employed at pres-

The value of the invention consists in the exposition of the soaked hides to the rays. The present process of souking the leather in vats requires about four months so that the chemicals may penetrate every fiber of the skin. Under the new system the chemicals absorbed by the h d s in the two hours' sonking are decomposed by the X-rays in

less than half an hour. Every molecule is thoroughly penetrated and the leather is as perfect as any tanned by the old process. Prominent and large training concerns and leather experts have tested the product and ray that it is the

equal of any other leather.

After the hides have been soaked in the solution they are put on a highly polished steel plate and a series of three tubes diffuse the rays upon their entire surface. They remain in this state for about twenty minutes, when they are ready to finish as tsual into enamel, patent leather or any desired article. The great difficulty with which the in-

ventors met was to obtain a ray sufficiently strong to penetrate the entire bide. The discovery of Sheidel's coil led them to further experiments and gave them a ray powerful enough to photograph a hand after the ray had been passed through a city directal and the companies of the

tory, an oak board and the hide intended to be tanned. This gave absolute proof that they will be able to tan about twenty hides at one time, laying one upon the other,

Not only will this new process reduce the time necessary for tanning from four months to four days, but it will also reduce the cost of manufacture fully 75 per cent. More than that, it will be possible to fit up a plant necessary for the working of the process at about one-fourth the cost of creeting a plant under the present system, and all skilled labor will be dispensed with, not even an electrician being necessary once the plant is in operation.

The local inventors have now perfected their process, and by the end of the week they expect to have several hides completed for inspection. The applications for patents and foreign rights are now being made, and as soon as they have been granted the plant and the process will be put to competent use.

put to commercial use.
TANNERIES TO BE BUILT. The plan principally favored is the organlzation of a large company to establish tan-neries not only in this city, but throughout the country, entering into direct competi-tion with the other manufacturers who em-ploy the old, more lengthy and more ex-

The inventors were led to make the ex-The inventors were led to make the experiments which resulted in their valuable discovery by the chemical effect of the X-rays in the process of photography. If their claims in the present discovery materialize—and from all appearances they are thoroughly practical and substantiated by the finished projuct—they record it as but the finished product—they regard it as but the first step in the use of the X-ray in commercial industries, which will eventu ally lead to its employment in a great de gree in manufacturing interests,

ARREST TWO WOMEN ON ROOF. One Clings to Cornice Intending to

Jump on Adjoining Building. May Harrington and Mumie Walker were

arrested by three policemen on the roof of the three-story building at No. 818 Morgan street at 11 o'clock last night. The Har-rington woman was hanging from the for-nice, intending to drop to the roof of a two-stery adjoining building. The Walker wom-an was coming out of a skylight when taken in custody. taken in custody.

They were wanted on a charge of larceny.

The Walker woman was recently released from the pentientiary. May Harrington has been convicted of panel working several times. May Raymond was also arrested.

Child Run Down by Car.

Ida Fadem, 5 years old, living with her parents at No. 1614 North Vandeventer avenue, was run down by a Vandeventer car while crossing the tracks at Windsor place at 6:20 o'clock last night, and seriously injared. She was carried unconscious to her home by Loctor Harrison of No. 1303 North Garrison avenue, who was a passenger on the car. She was internally injured.

New York Curb Market.

REPUBLIC SPECIAL.

New York, June 6.—The curb market to-day opened duil and tregular. Prices were generally below last night's close. At the close the market was a little active, and with irregular net price changes. Total trades were 20,000 shares. Northern securities was an active feature of the early trading. It make a new low record to-day. This steek self-from 5th down to \$0.5 and then to 91 for the charge of the control of the control of the charge of the form of the charge of the first place. Internmental and Belting 6s sold at 90.5 for \$1.00. Internmental and Belting 6s sold for 90 bonds. Three hundred and sold American Can preferred at 441. \$7.00 Lacks were affected at 441. \$7.00 Lacks were for the charge of the place of REPUBLIC SPECIAL.

WHEAT OPENS WEAK AND JULY IS LOWER AT CLOSE.

COMMISSION HOUSES ON THE SELLING SIDE EARLY.

Cables and Weather Disturb Corn, but Market Becomes Firm Late in Day.

Chicago, June 6.-Wheat opened weak and, although the market steadled somewhat later in the session, the close showed a loss for July of 42%c. Corn closed firm at a shade lower than yesterday. Oats closed strong at a gain of 14014c. Provisions were down 507%c to 15c. WHEAT.

General selling by commission-houses caused the early weakness in wheat, July showing a loss at the opening of 14% to 15% showing a loss at the opening of 46%c to

CORN. The cables and the weather caused com mission-houses to be heavy sellers of corn earlier in the day, and the opening showed considerable weakness, but some of the early sellers, on the upward tendency of wheat, became buyers, and the market firmed up, finally recovering the early loss. Crop reports were rather bullish, and local traders bought late in the day.

The close was steady at the high point—48%c, a shade below yesterday's close. Local receipts were 302 cars, with 25 of contract grade.

OATS. A rush of selling orders caused a decline in oats at the opening, but later the market became strong, the close showing July 16614c higher, at 364c, after ranging between 3%c and 3%c. The strength was largely due to the drought situation in the East. Cash demand was poor. Local receipts were 168 cars.

RANGE OF FUTURES. RECEIPTS AND SHIPMENTS. Ship. 8,500 23,000 379,700

PROVISIONS. The provision market weakened on selling of pork creditel to some of the large packers and of ribs by brokers. The market was steady early, in sympathy with the hog situation, but on free offerings, with no support, prices could not hold, and closing figures were be lower for Sept, pork, at \$10.50; 5975c off for lard, at \$8.875, and 75c (win for ribs, at \$3.125).

Estimated receipts for Monday: Wheat, support, prices could not hold, and closing figures were the lower for Sept. pork, at \$15.50, 50.75c off for lard, at \$8.875, and 75c dewn for ribs, at \$1.125.

Estimated receipts for Monday: Wheat, 45 cars; corn, 475 cars; oats, 25 cars; hogs, 30,000 head.

In this market arbitrage houses were moderate buyers, taking in all about 10,000 shares. Atchison—After a slight rise it reacted sharply on what looked like an attack by the bears who have been operating in the stock for the past two weeks, it railled on busing by Savin & Co., which was generally regarded as covering by Weil, followed by scattering commission-house purchases, and covering by room shorts. Later it went with the course of the general market.

St. Paul—The feature was buying by Hutter & Gross, said to be for Standard Oil interests. The selling was scattering, some of it being by traders. There was, however, considerable short covering, One of the stories to-day was that one of the leading life insurance companies had taken advantage of the recent slumn to accumulate a large line of the stock under 150.

Rise and Fall of the Rivers

River Forecast.

The Missouri has fallen rapidly at Kansas City; has remained staffonary since mon yesterday at Bonnille at a stage of 30.9 feet, and has risen 1. during the last 21 hours to a stage of 22.1 feet at Hermann. The stage of 30.5 feet forecast yesterday for Hermann will be reached by Sunday night. The stage of the Mississippi has not charged materially morth of the mouth of the Miss uri, but south of that point continues to rise rapidly. A stage of 21 feet will be maintained at Graffon for several days.

At St Louis the rise will continue rapid through the next 48 hours, and the crest stage of 3.5 feet forecast yesterday for Monday or Tuesday, appears certain of being reached, and measures to protect property from a stage of 37.5 feet should be taken.

e harbor gauge yesterday evening marked feet, indicating a rise of 1.15 foot in 24

WASHINGTON AVENUE

MRS. RUNKLE'S DEATH BROKE CHAIN OF FIVE GENERATIONS.

Woman Who Left 54 Descendants Was 20 Years Old and Had Lived in St. Louis Since 1835.

By the death of Mrs. Margarethal Runkel of No. 3525 North Ninth street last Friday morning, a chain of five generations was

death more than 99 years old, was one of North St. Louis's oldest residents, having lived in this city most of the time since her arrival in this country in 1835. She remembered when the city only had a log cabin Courthouse.

She lived for several years at Peru, III.,

She lived for several years at Peru, III., and took great pride in having lived in Daniel Webster's house, where three of her children were born.

She once watched a darky burned at the stake at the spot where the Courthouse now stands, in this city, and she remembered the sight almost to the day of her death. The cause of her death was sentlity.

Mrs. Runkel leaves fifty-four descendants—three child, fourteen grandchildren, thirty-six great-grandchildren and one great-groat-grandchild. The children are: Henry Runkel, Daniel Runkel of Leppen, Mo. and Mrs. Christina Burbach.

The funeral will take place to-morrow from the family residence on Ninth street. Services will be conducted at the house by the Revarend Doctor Horstmeyer of the Reformed Salem's Church, corner of Fourteenth and Sullivan avenue. The burial will be in St. Margaret's Cemetery.
